

To whom it may concern

Dear Madam, Dear Sir,

**Temprid<sup>®</sup> 75 Residual Insecticide**

Temprid 75 Residual Insecticide is registered by the Australian Pesticides and Veterinary Medicines Authority (APVMA) for control of insect pests in domestic, commercial, industrial and public buildings. The product is approved for use in food processing establishments, shops, factories and offices etc.

Temprid 75 Residual Insecticide is recommended for use as a residual surface spray and is not for direct application to humans, exposed food or food utensils or food preparation areas.

Temprid 75, together with a range of Bayer insecticides, has been assessed for any potential hazard to food safety in a hazard analysis by HACCP<sup>1</sup> International. The HACCP hazard analysis includes an assessment of human allergens in the product and any associated risks which might result from use of the product in food processing areas.

Temprid 75 contains no human allergens and has been certified by HACCP as being suitable for use under Food Zone Classification NFZ (non-food zone). A copy of the current HACCP certification for Bayer CropScience Pty Ltd products is attached.

Yours faithfully,

Margaret Fitzgerald  
Regulatory Affairs, Environmental Science
